##### Abstract

This clipped version contains 55 constituencies, excluding area outside constituency, and has been created for map creation/cartographic purposes and may not fully represent the official full extent boundaries. Constituencies are established under the Local Electoral Act 2001. This dataset is the major released version of the annually released regional council constituency boundaries for 2019, clipped to the coastline and result from the division of a region for electoral purposes. If a regional council decides to have a Māori constituency, the constituencies within the region are known as general constituencies and Māori constituencies. Constituencies are divisions of regional council areas. They are defined at meshblock level, and do not coincide with statistical area 1 (SA1) or statistical area 2 (SA2). They are created, based on population, to be the voting areas within councils. Constituencies are required to reflect communities of interest. Their boundaries, so far as is practicable, coincide with those of territorial authorities or wards. The boundaries of constituencies may be reviewed before each three-yearly local government election. Regional councils must review their representation arrangements at least once every six years. The provisions for such reviews are in the Local Government Act 2002. Constituencies are numbered based on their corresponding regional council. Each constituency has a unique

four-digit code. The first two digits represent the regional council that the constituency lies within. The last two digits are sequential and represent the number of constituencies within a regional council. For example, the West Coast Regional Council (12) contains three constituencies, which are coded 1201, 1202, and 1203. The following table lists the total number of constituencies by year: Year Constituency totals 1989 961 992 781 995 831 998 722 000 672 001 672 002 692 003 369 200 469 200 569 200 669 200 769 200 862 200 962 201 062 201 156 201 256 201 356 201 4 boundary data became freely available on 1 July 2007.

#### Purpose

CON2019\_V1\_00 is the major released version of the annually released regional council constituency boundaries as at 1 January 2019, clipped to the coastline. This version contains 55 constituencies, excluding area outside regional council constituency.
