**Abstract**

MBHG2019\_V1\_00 is the major released version of the annually released meshblock boundaries concorded to higher geographies for 2019. This version contains 53,596 meshblocks, including 16 with empty or null geometries (non-digitised meshblocks). This Meshblock Higher Geographies 2019 file is a correspondence, or concordance, which relates meshblocks to larger geographic areas or 'higher geographies'. This generalised version has been simplified for rapid drawing and is designed for thematic or web mapping purposes. The higher geographies contained in this concordance are: community board (CB2019), constituency (CON2019), Māori constituency (MCON2019), regional council (REGC2019), statistical area 1 (SA12019), statistical area 2 (SA22019), subdivision (TASUB2019), territorial authority (TA2019), urban rural (UR2019), urban rural indicator (IUR2019), and ward (WARD2019). The following geographies were first introduced in 2018: statistical area 1 (SA1), statistical area 2 (SA2), urban rural (UR), and urban rural indicator (IUR). These new geographies are part of the Statistical Standard for Geographic Areas 2018 (SSGA18) which replaces the 1992 New Zealand Standard Areas Classification (NZSAC92). The statistical standard for geographic areas is to be used from 2018 (SSGA18). It defines the Stats NZ input and output geographic classifications and describes their primary purposes, and sets out requirements and guidelines for the creation and maintenance of statistical geographies. For further information on individual higher geographies, refer to their metadata. For further information on individual higher geographies, refer to their metadata.

**Purpose**

MBHG2019\_V1\_00 is a major released of the annually released meshblock boundaries concorded to higher geographies as at 1 January 2019. This version contains 53,596 meshblocks.
